

E Lynch and Sons Ltd

Position: Site Manager

We're looking for experienced and established Site Managers. We have a great reputation for employee retention and promoting from within. This will provide the opportunities for ambitious individuals to progress within the company.

Responsibilities that the Site Manager will have are:

Overseeing Construction Projects:

- Supervising construction projects from conception to completion.
- Reviewing projects in-depth to schedule deliverables and estimate costs.

Coordinating and Supervising:

- Coordinating and supervising construction workers.
- Selecting tools and materials and ordering/purchasing material appropriately.

Health & Safety:

- Ensuring adherence to all health and safety standards and reporting issues.
- Inspecting construction sites regularly to identify and eliminate potential safety hazards.

Communication and Management:

- Managing the use of construction equipment and machinery.
- Resolving problems and implementing improvements in construction processes.
- Maintaining communication between project managers, site staff and clients.

Desirable/Essential criteria:

- A Bachelor's degree in Building Science, Construction Management, Civil Engineering, or a related field.
- Proven work experience in construction management or a similar role.
- In-depth understanding of construction procedures and project management principles.
- Familiarity with construction and project management software.
- Certifications such as Certified Construction Manager (CCM) or Project Management Professional (PMP) can be advantageous.
